The economist may write the name and search for it or it can find it listed as he clicks the button

Worker	From date	To date	Daily Wage	Salary
Name 1				

It is set by the economist depending on position and experience of the worker.

In this section it is shown how many days the worker has worked

\times Daily Wage.

This daily wage will be calculated along with the days worked for the selected period of time to produce the salary which will be shown in the next column.
