

Economist Window

button to sort workers from A to Z or Z to A

Select a date (It will be shown as a calendar to select the date)

Workers	Date	In	Days off request
Yame 1	<input type="text"/>	<input type="button" value="Clock in"/>	<input type="button" value="Request"/>
Yame 2	<input type="text"/>	<input type="button" value="Clock in"/>	<input type="button" value="Request"/>
Yame 3	<input type="text"/>	<input type="button" value="Clock in"/>	<input type="button" value="Request"/>
...		...	

Once you select this button it will show that the worker has clocked in for that chosen date
Economist will make the request by clicking the button and it will show "Requested" → this will also be shown at admin's window for approval

Calculate Payment

→ this button will send up to the payment window

Inventory

Select Date (shown as calendar)

Date	Project	Material	Amount	Unit Price	Total
From: <input type="text"/>
To: <input type="text"/>					

* This table will be connected with Engineers window

So, engineers will write down everything they need for their project, everything and it will be listed over here

Purchase order

Material	Amount
1.	...
2.	...
...	

→ This will show up at Administrator window → To do list
